***Naval Aviation Vision 2020* Now Available Online**

Public Affairs Officers: Changes in readiness, platforms, weapons, and manpower initiatives have transformed Naval Aviation. *Vision 2020* shows where we are and the way ahead.

The Naval Aviation has written its “roadmap for the future,” a full-color 152-page book defining the way ahead for Naval Aviation in the 21st century” in powerful text and photos. The online version (.pdf format) can now be viewed and read on <http://www.nae.cnaf.navy.mil/>. You will need a current version of the Adobe Acrobat Reader plug-in installed in your browser. If the Reader plug-in is not already installed, you can [download it free from Adobe](#).

Vision 2020 lays out where Navy and Marine Corps aviation is headed in the years to come. It provides an overview of Naval Aviations current and future warfighting readiness:

- Mission and vision for the 21st century
- Current and next generation aircraft and weapons
- Naval Aviation and the CNO's guidance for FRP and Sea Power 21
- The NAE, its structure and function
- Future readiness, including Sea Power 21 and various transformation roadmaps
- Naval Aviation science and technology, providing ongoing initiatives to deal with known and projected threats

PAOs and other interested parties are urged to distribute the book electronically as they see fit. The link and icon below will be useful.

A softcover print version of the book will be available in June. We will keep you advised.
